Maximum 20% discount off the standard price is available for all academia customers.

Qualifying Customers:
- Universities
- Graduate schools
- Technical colleges
- Training facilities
- Vocational schools
- Polytechnic centers
- Professors, Teachers, Students
- Academic researchers

Select From Roughly 200 Products
- Impedance Analyzers
- LCR Meters
- Power Analyzers
- Power Meters
- Power Loggers
- Data Acquisition
- Data Acquisition Units
- Data Loggers
- Power Quality Analyzers
- Current Probes
- Precision DC Voltmeters
- Resistance Meters
- Picoameters
- Battery Testers
- Clamp Meters
- Digital Multimeters
- Heat Flow Sensor
- Options

* Calibration documents not included and are sold separately.
* May not be combined with any other offer.
* Discounts and applicable products may vary depending on your country. Please contact your local Hioki sales office for more details.

Hioki - Supporting Technological Advancement in Education and Research
Special Academic Pricing for Popular Instruments Designed for Research & Development

**LCR METER IM3536**

General-purpose LCR meters with measurement frequency from DC, 4Hz to 8MHz

- DC, 4Hz to 8MHz measurement frequency
- High-speed measurement of 1Ms (fastest time)
- High-precision measurement of ±0.05% rdg. (representative value)
- Guaranteed accuracy range from 1mΩ, low-impedance measurement with unmatched repeatability
- DC bias function: Measure under conditions simulating actual use or in accordance with industry standards
- Exceptional specifications and cost-performance for a wide range of applications, from R&D to production lines

**POWER ANALYZER PW6001**

Measure the power of high frequency, low power factor devices with waveform analysis that competes with the capabilities of an oscilloscope

- Basic accuracy of ±0.02%/1 for power measurement (*1 PW6001 accuracy only. Instrument delivers accuracy of ±0.07% even after the current sensor accuracy has been added.*)
- High noise resistance and stability (80 dB/100 kHz CMRR, ±0.01%/°C temperature characteris)
- Accurate measurement even when the load is characterized by large fluctuations. True-HD 18-bit resolution
- 10 ms data refresh while maintaining maximum accuracy (using a specially designed IC to make all measurements independently while performing simultaneous calculations.)
- DC accuracy of ±0.07%, which is key for stable, accurate efficiency measurement
- Wideband harmonic analysis up to the 100th order with a 1.5 MHz bandwidth
- Synchronize 2 units for up to 12 channels*2 in real time
- *2 Two 6-channel models can be connected with an optical connection cable (over a maximum length of 500 m) to enable numerical and waveform synchronization.
- Wideband harmonic analysis up to the 100th order with a 1.5 MHz bandwidth

**MEMORY HICORDER MR6000**

Long-term waveform recording at high-speed isolated 200MS/s sampling

- High-speed 200MS/s isolated testing (with High-Speed Analog Unit U8976Ax8)
- Simultaneously measure up to 32 analog channels (with 4ch Analog Unit U8975x8)
- Real-time saving of data of all 32 ch at 1MS/s (with SSD Unit U8332)
- Memory Concierge: Easily search for the waveform you want to see with the waveform search function
- Faster save times (1/10th the time required by legacy models)
- Real-time digital filter calculation

Don't miss a single event with the 200MS/s high-speed isolated sampling

HIGH SPEED ANALOG UNIT U8976

- MR6000 only
- 12-bit A/D resolution measurement
- Isolated input with optical isolation devices
- Measurable conductor diameter: ø0.3 (0.01 in) to 5 mm (0.20 in)
- Cable length 1 m (3.28 ft)

**AC/DC CURRENT SENSOR CTE6904**

- 500 A (rms) rated for measurement of large currents
- DC to 4 MHz (±3 dB) wide measurement frequency range
- ±10 ppm excellent linearity
- 120 dB (100 kHz) high Common-Mode Rejection Ratio (CMRR)
- ±0.077% power accuracy in combination with the Hikoki PW6001 Power Analyzer

Achieve both wideband 4MHz and large 500A current testing with the world's most advanced high accuracy sensor
